

SLIP ROBOTICS

LOAD & UNLOAD ANY TRUCK IN 5 MINUTES

Any dock. Any freight. Zero WiFi.

MAKING DOCK AUTOMATION ACCESSIBLE

2020

Slip Founded

- Founded by industrial engineers from Tesla and Volley
- Focus: automating the unautomated warehouse dock

2023

Series A Funded

- **Planted roots in Georgia**
- Launched Slip Bot and grew engineering team

2024

Series B Funded

- Scaled production & manufacturing
- Expanded market footprint
- **Established national presence**

2026

SlipLift Launched

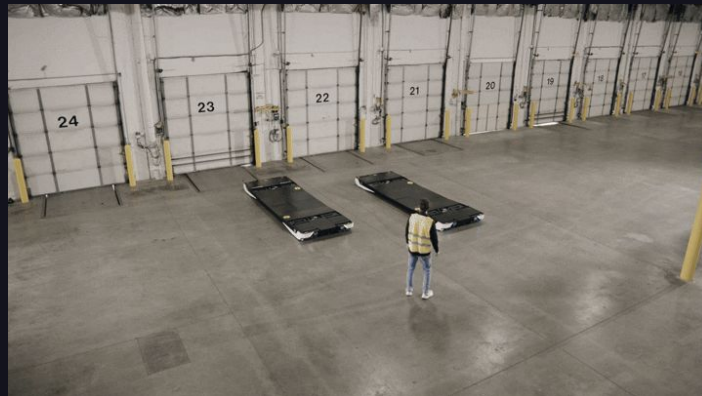

- Released April 2026
- Designed for network operations
- **Established international presence**

TWO PLATFORMS = COMPLETE COVERAGE

SlipBot

SlipLift

1. Predictability

Maintain reliable load/unload times across shifts and routes, and easily track your freight.

2. Scalability

Slip products are built to scale with your sites, multiplying time and cost savings across your business.

3. Time to Value

Deployment is fast, and value is realized near instantly with improved throughput and safety.

HUMAN-IN-THE-LOOP DESIGN

01

Humans Orchestrate

Operators decide what moves next and when, focused on flow and decision-making rather than high-risk manual tasks

02

Robots Execute

Autonomous handling of physical, precise work—entering & exiting trailers. Operators stay out of trailers.

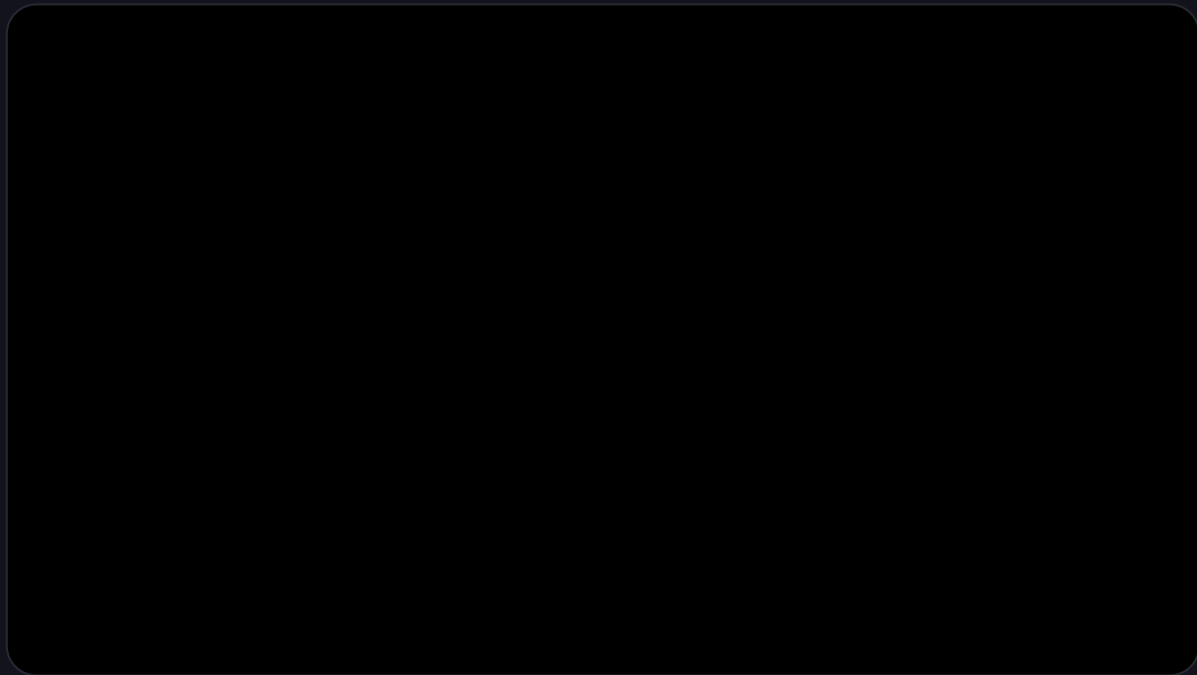

SIMPLIFIES EXISTING PROCESSES

SlipBots drive continuous flow with fewer trucks, trailers, & docks.

1 Stage Freight

2 Align & Auto-Load

3 Auto-Unload & Repeat

Bots In Action

SLIP APPLICATIONS

SWAPPABLE BATTERY SYSTEM

Slip batteries can be swapped in seconds and require no additional tools. Charge up to six batteries simultaneously from a standard 120V outlet.

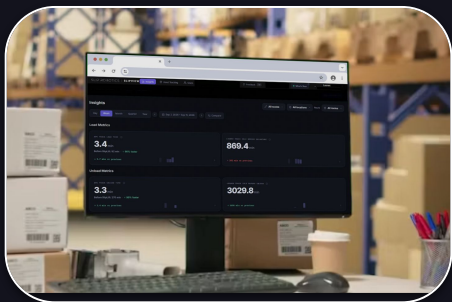

Battery Specs

Battery Type	Lithium Ion
Voltage	51.2
Swap Frequency	Once per shift
Outlet	120V/20A
Weight	<20 pounds
Durability	10,000 swaps

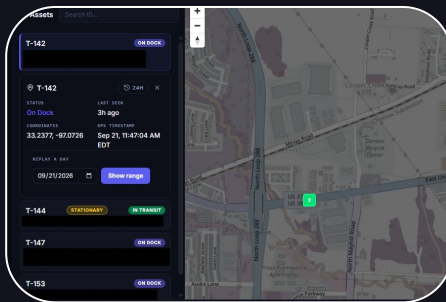

GET TRANSPARENCY FROM YOUR DOCK

SlipView brings metrics tailored to your operation

Live Dashboards

SlipView's live dashboards bring clarity to your dock and help you track changes over time.

GPS Asset Tracking

With GPS pings every 3 seconds, replay your day to know where your freight went, where it stopped, and for how long.

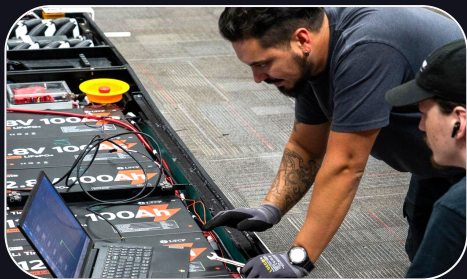

Ongoing Updates

Products are continuously supported with software updates that make managing your fleet even easier.

Shared Assets

DEDICATED SERVICE TEAM

Our service team trains operators, deploys fast, and is laser-focused on maximizing product uptime.

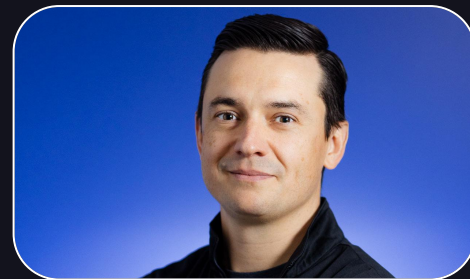

On-site Product Support

Our regional mechanics reach you promptly to service your bots and improve performance.

Remote Support

Customer service is on call to troubleshoot issues and action your feedback.

Proactive Account Management

Account managers ensure you're getting the value promised from your bots and will scale your system to meet demand.

ONBOARDING

Signing

Requirement

Account management scopes out your needs, answers questions, and sets your delivery date.

Week 1

Delivery

Your bots are delivered, and Slip gets to work setting up peripherals and staging equipment.

Week 2

Training

Our team trains operators and establishes procedure, easing the transition to your updated dock flow.

Week 3

Deployment

Your team is ready, and Slip is live in your daily operations.

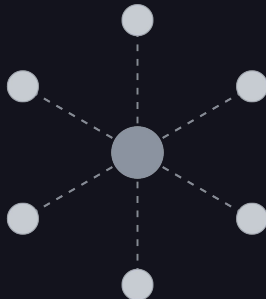

SUPERCHARGE YOUR DISTRIBUTION

As your system scales, efficiencies start to multiply across your entire operation

Traditional Hub and Spoke

Traditional Hub and Spoke

HARDRESULTS

One major home improvement goods distributor improved throughput and efficiency at their sites so much, they were able to cancel plans to open up a new distribution center, saving hundreds of thousands in CapEx costs .

SLIP ROBOTICS

Shared Assets

CONFIGURE CARRIERS NOT BOTS

SlipCarriers are shared assets that can handle any freight without changing automation.

TWICE THE SPEED, HALF THE LABOR

Customer Case Study: Automaker shuttling inbound freight from warehouse into manufacturing plant

The Challenges

High labor costs, costly logistics, slow & inconsistent delivery speeds.

The Solution

10 SlipBots implemented in <2 weeks for 5x faster load/unload

The Result

89% Annual ROI <5 Month Payback
(based only on hard labor savings)

	BEFORE	AFTER
Trips Per Day Round-trips	5	11
Load & Unload Times Per Trailer	25 - 60 mins	5 mins
Material Handlers Per Shift / Facility	4	1 w/ extra capacity
Truck Drivers Per Shift	3 - 4	1
Trailers Used Per Shift	8	1
Dock Doors Used Per Facility	3 Drop & Hook	1 Live Load
Delivery Lead Times Average Total Time Per Trip	150 min Inconsistent high daily variance	73 min Consistent low daily variance
